

Volatile natural gas prices will affect Tampa Electric bills.

The Florida Public Service Commission (PSC) approved Tampa Electric's request for its 2023 rates. This adjustment is the first of two steps. The company expects another increase in early 2023, to reflect uncollected fuel costs for 2022. The company is phasing in the increase to ease the transition and to reduce the impact on customer budgets.

Big Bend Modernization project

Our recently completed Big Bend Modernization project will save customers more than \$700 million over its life. Big Bend Unit 1 is the most efficient unit in Tampa Electric's fleet.

Fuel

Natural gas prices are three times higher than they were in 2020. We make no profit on this portion of your bill. Although we cannot control the global factors impacting fuel costs, we are making long-term investments to use the least amount of fuel possible by increasing efficiency at our power plants and expanding renewable energy with more solar projects.

Continued investment in solar

We continue to invest in solar projects, contributing to a cleaner energy future and reducing our use of fuel to generate electricity. Solar power generation is expected to reduce fuel costs by about \$90 million in 2022 alone.

More about your lighting rates.

We've provided details for all lighting fixtures and poles on this sheet. The energy charge, including conservation, environmental and capacity cost recovery charges is 3.51¢ per kilowatt-hour (kWh). The fuel charge to pay fuel suppliers is 4.767¢ per kWh. A basic service charge of \$0.71 per day will be added to metered lighting accounts. Rate schedules are subject to gross receipts taxes, city and state taxes and franchise fee where applicable.

We're here for you.

Visit tampaelectric.com/ratecommunications for more information. To speak with a representative, call 888-223-0800 weekdays from 7:30 a.m. to 6:00 p.m.
