

IMPORTANT RATE INFORMATION FOR COMMERCIAL AND INDUSTRIAL CUSTOMERS

The Florida Public Service Commission (PSC) recently approved an increase to Tampa Electric's 2022 base rates and service charges. The new rates are effective Jan. 1, 2022.

The increase will address growth in rate base and associated depreciation expenses; cost recovery for undepreciated net book value of assets to be retired; modest increases to operations and maintenance expenses to continue providing safe and reliable service that meets customer expectations; and the addition of more solar generation and a highly efficient clean-burning natural gas unit.

Starting in January, you'll see a new line item on your bill called the Clean Energy Transition Mechanism. It will collect the remaining unrecovered costs for certain assets being retired over 15 years. This is a levelized charge that benefits all customers through increased rate certainty and supports the company's efforts to reduce emissions by replacing aging coal-fired generation with clean-burning natural gas and zero-fuel solar generation. It also supports the replacement

of retired meters with an Advanced Metering Infrastructure, which will provide customer benefits, such as automated disconnection and reconnection (without a service visit) and associated lower service charges, as well as providing customers with greater access to their usage data in the future.
