

Fuel increase will raise electric bills.

The cost of natural gas, which is used to generate electricity, is passed through from fuel suppliers to you with no markup or profit to Tampa Electric. Due to a significant rise in global natural gas prices, the Florida Public Service Commission (PSC) has approved an increase to customer bills effective April 2022. Although bills will increase, they will still be among the lowest in Florida.

All Florida electric utilities adjust their fuel and capacity costs annually, typically in January. However, when costs are expected to change more than 10 percent, utilities can request an additional adjustment. With the PSC's approval, commercial and industrial customers will see an increase between 10 percent and 25 percent, depending on usage. Tampa Electric's fuel mix includes natural gas, coal and solar.
