

Uncollected fuel costs from 2022 and storm-related expenses will affect Tampa Electric bills.

The Florida Public Service Commission (PSC) approved Tampa Electric's request to recover uncollected fuel costs from 2022 and expenses for the prompt restoration efforts after Hurricanes Ian and Nicole. Effective in April, the typical residential customer's monthly energy bill will increase by about 10 percent, or \$14.41, to \$161.13 for 1,000 kilowatt-hours (kWh) of use, from the \$146.72 customers pay today.

Fuel

The fuel adjustment is the second of two steps, as initially mentioned in the autumn. The company waited until early this year to file this increase to help mitigate the costs. To further reduce the impact on customers, the company will spread the fuel costs over 21 months, through the end of 2024. Fuel and storm costs are passed directly to customers without any markup by the utility.

Storm Surcharge

Customers will pay a temporary storm surcharge for the prompt restoration efforts for storms and hurricanes in 2022, and also replenish the company's storm reserve. These costs will be spread over 12 months, beginning in April.
