

TAMPA ELECTRIC KEEPS YOUR BUSINESS IN THE BLACK

WITH RELIABLE, LOWER-COST ENERGY.

Our rates are **37% less** than Duke's and **12% less** than FPL's

We offer the lowest investor-owned utility commercial rates per megawatt-hour (\$/MWh) in Florida.

Based on Tampa Electric's commercial GSD, FPL's GSLD-1 and Duke's GSLD rates as of June 2024.

TAMPA ELECTRIC HELPS YOUR BUSINESS SAVE MONEY AND ENERGY.

Tampa Electric delivers long-term affordability to our customers through investments in power plant efficiency and smart technology, which help keep costs down. In addition, since 2017, our solar investments have saved customers about \$200 million in fuel costs. These investments also provide a second form of power generation that improves reliability and reduces fuel price volatility.

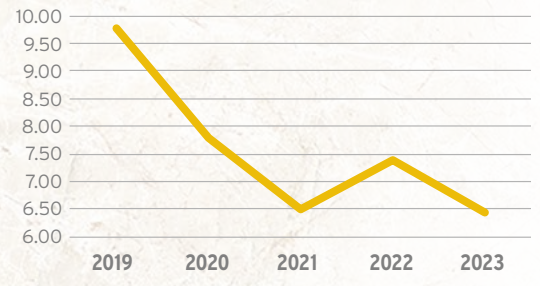

WE DELIVER 99.98% SERVICE RELIABILITY TO KEEP YOUR BUSINESS RUNNING SMOOTHLY.

Since 2021, we've:

- Increased the reliability of our service by 30%.
- Reduced the frequency of power outages by more than 20%.
- Shortened the duration of those outages by almost 30%.

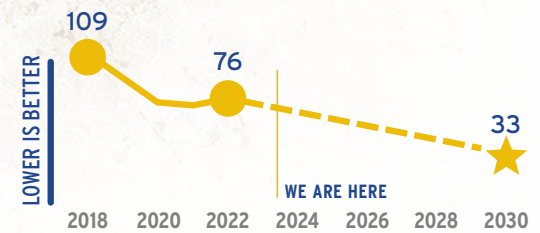

And we're not stopping there. We continue to make investments that strengthen our system and improve its resiliency for our customers who depend on us every day.

MOMENTARY OUTAGES

Today the average customer experiences 34% fewer momentary outages.

CUSTOMER OUTAGE TIME In Minutes

We've decreased the length of customer outages from 109 minutes in 2018 to about 75 minutes today, with a goal of less than 33 minutes by 2030.
