

TAMPA ELECTRIC POWERING YOUR SUCCESS

Tampa Electric has been the leading provider of electricity in West Central Florida for more than 125 years. We deliver 99.98 percent service reliability to more than 840,000 customers, including 85,000 businesses throughout Hillsborough and parts of Pasco, Polk and Pinellas counties. We also offer more energy-saving programs than any other utility in Florida and engage with economic development partners to enhance business growth.

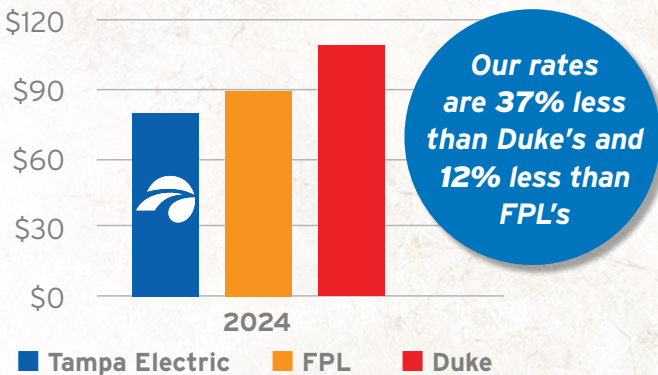

FOCUS ON AFFORDABILITY AND EFFICIENCY:

Since 2017, our solar investments have saved customers more than \$250 million in avoided fuel costs. We're also investing in power plant efficiency to help keep our rates lower than other utilities.

Lower Rates (\$/MWh) Keep Costs Down

Commercial Rate Comparison (\$/MWh)

Based on Tampa Electric's Commercial GSD rate as of June 2024.

Reliable Service with a Resilient Grid

To reduce restoration costs and power outage durations, we use self-healing technology to

identify power line problems and remotely redirect electric service around them. We're also enhancing our resilience against extreme weather by strengthening infrastructure, undergrounding overhead power lines and trimming trees.

Generating Solar Power to Serve You Better

Tampa Electric has the highest percentage of solar generating capacity of any utility in Florida, and by 2026, 17 percent of our energy will come from the sun. By generating more electricity from the sun, we're consuming less natural gas. That means we spend less on fuel - and we pass those savings on to you.

Simplifying with Digital and Self-Service Solutions

To help you save time, we provide self-service solutions and customizable notifications about your account. These tools help you make informed decisions about your energy use with personalized usage insights and actionable energy-saving recommendations that help your business save money.

Investing in a Bright Future

We're committed to energizing our community beyond electricity. That's why we invest in workforce development, conservation and customer assistance programs to promote prosperity in our region.
