

Rely on us for your outdoor lighting solutions.

Bright Choices® offers outdoor lighting solutions for home, business and government.

Why choose Tampa Electric?

- Serving customers with affordable and reliable power for more than 120 years
- Currently maintain more than 200,000 streetlights and area lights
- You lease the lighting and poles - no up-front costs
- Hassle free maintenance and repair

LEDs offer many advantages over conventional lighting sources.

Tampa Electric offers only premium **Light-Emitting Diode (LED)** lamps that produce a bright, natural white light that is similar to daylight and provides the most natural color accuracy of any outdoor lamp. If you're all about "going green," LEDs are ideal for those interested in LEED® certification. Common uses: security, car dealerships, theme parks and areas where objects appearing in their natural or realistic color is important.

Energy Savings

LEDs use 30 percent to 60 percent less energy than high-intensity discharge (HID) lighting such as high-pressure sodium (HPS) and metal halide (MH) technology. And that's not all. LEDs require less maintenance which adds to overall savings.

Performance

LEDs capture the authentic colors of objects lit at night - a big advantage for car dealerships and security lighting. LEDs achieve full brightness almost instantly and offer very precise control over lighting patterns.

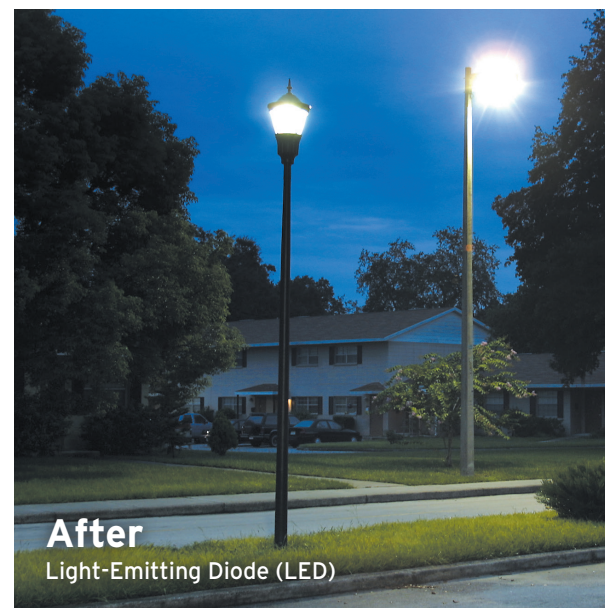

Long Life

LEDs can last 50,000 hours or more, compared to 30,000 hours for HPS and 7,000 hours for MH. LEDs are highly resistant to shock and vibration and are not sensitive to high or low external temperatures.

Environment

LEDs contain no mercury, avoiding the need for hazardous material handling and disposal. LEDs are dark-sky friendly and help preserve the night by focusing the light on the lighting target, generating less stray light pollution than some other types of lighting.

Visit TampaElectric.com/BrightChoices to learn more about the benefits of LED lighting.
